Summary

Detail-oriented and well-organized **Junior Android Developer** skilled in **Kotlin, Java, and Jetpack Compose**. Passionate about building clean, scalable apps using modern architecture and best practices.

Experience

Associate Software Engineer, Fawry – Cairo, Egypt Aug 2025 – present

- Architected and developed a robust **Card Reader SDK** from scratch using **Kotlin**, supporting **Visa, Mastercard, Mada, and Amex** kernels for secure payment processing.
- Engineered a modern **Android Permission Library** to replace legacy RxPermissions, improving code maintainability and adopting modern reactive patterns.
- Integrated **Pure Kernel** into existing terminal software to enable support for **Mada cards**, expanding payment accessibility for merchants.
- Contributed to the **SalesRep app**, a critical tool for Fawry's sales force to manage merchant relations and transactions.
- Optimized build systems using **Gradle Convention Plugins**, multi-module architecture, and **Build Variants** to streamline the development of complex terminal applications.
- Conducted technical knowledge sharing sessions on **AIDL and Inter-Process Communication (IPC)**, enhancing the team's ability to handle background service interactions.
- Researched and implemented **KMP (Kotlin Multiplatform)** with AGP 9.0 and **R8 optimizations** to ensure secure, high-performance, and cross-platform compatible codebases.
- Gained specialized expertise in **Fintech hardware**, working with **Pax SDKs (Neptunelite)**, ISO messages, and EMV transaction flows.

Education

Information Technology Institute (ITI), 9-Months Professional Diploma in Smart Village Branch, Egypt Oct 2024 – June 2025

- Mobile Applications Development (Native)

Helwan University, BSc in Computer Science Oct 2020 – May 2024

- GPA: 3.33/4.0 **Very Good** with honors
- Graduation Project: Lawyer Assistant Chat bot - Grade: **Excellent**

Projects

OutfitGo, E-commerce Mobile Application Github

- Developed a modern E-commerce Android app using **Kotlin** and **Jetpack Compose** for a reactive UI.
- Employed **MVI** with **Clean Architecture**.
- Integrated **Apollo-Client** for **GraphQL** API calls to **Shopify Backend** and **DataStore** for settings management.
- Managed asynchronous tasks and concurrency with **Coroutines and Flows**
- Implemented **Unit Testing** with **MockK**.
- Used **Hilt** for Dependency Injection.

Vertex, Weather Forecasting App Github

- Developed a modern Android weather app using **Kotlin** and **Jetpack Compose** for a reactive UI, employing **MVVM** with the **Repository pattern**.
- Managed asynchronous tasks and concurrency with **Coroutines and Flows**, ensuring background processing

with **WorkManager** and **Coroutines**.

- Integrated **Room** for local data persistence, **Retrofit** for API calls, and **DataStore** for settings management.
- Implemented **Unit Testing** for **Room** and **ViewModel**, and integrated **Google Maps SDK** for interactive maps and **place search**.

Mealano, Food Planner Application

Github

- Developed using **Java** and **MVP** architecture with an **XML-based UI**, implementing reactive concurrency with **RxJava**.
- Leveraged **Room** Database for offline data access and user experience, and utilized **Retrofit** for RESTful API communication.
- Integrated **Firestore Database** and **Firestore Authentication** for user meal plan synchronization across devices.
- Implemented **SharedPreferences** for application settings and integrated with the device's **Mobile Calendar** using **Content Provider**.

Skills

Technologies: Kotlin, Java, Jetpack Compose, Material Design, Retrofit, Coroutines, RxJava, Room, Sqlite, DataStore, Navigation Component, Hilt, Koin, Coil, Firebase, Unit Testing, Instrumentation Testing, Problem Solving, OOP, Data Structure, Algorithms.

Tools: Android Studio, Android SDK, Version Control System (Git and Github)

Soft Skills: Organized Thinking, Self discipline, Team Collaboration and Adaptability

Certificates

Android Applications Development Workshop (3 Days) – AMIT Learning with Orange Digital Centers

Sept 2024

- learnt basics of Jetpack Compose
- Built Simple Meals Application using Jetpack compose find it on Github

Native Android Applications Development (Summer Training) – Information Technology Institute

July 2024 – Aug 2024

- learnt about core Android development using kotlin
- built Recipe app, find it on Github

Mobile Applications Development Training – Digital Egypt Pioneers Initiative - DEPI

Mar 2024 – Nov 2024

- focused on **Flutter**
- participated in Movie application using flutter. find it on Github

Languges

Arabic: Native

English: Minimum Professional Proficiency

Additional Information

Malitry Status: Exempted
