Summary

Detail-oriented and well-organized **Junior Android Developer** skilled in **Kotlin, Java, and Jetpack Compose**. Passionate about building clean, scalable apps using modern architecture and best practices.

Education

- | | |
|--|----------------------|
| Information Technology Institute (ITI) , 9-Months Professional Diploma in Smart Village Branch, Egypt | Oct 2024 – present |
| <ul style="list-style-type: none">• Mobile Application Development (Native) | |
| Helwan University , BS in Computer Science | Oct 2020 – June 2024 |
| <ul style="list-style-type: none">• GPA: 3.33/4.0 Very Good with honors | |

Projects

Vertex, Weather Forecasting App

[Github](#) 

- Developed a modern Android weather app using **Kotlin** and **Jetpack Compose** for a reactive UI.
- Implemented **MVVM** with the **Repository pattern** for clean architecture and data flow.
- Managed concurrency and asynchronous tasks with **Coroutines and Flows** for optimal performance.
- Ensured reliable background processing using **WorkManager** with Coroutines.
- Integrated **Room** for local data persistence and **Retrofit** for efficient API calls.
- Utilized **DataStore** for robust settings and configuration management.
- Implemented **Unit Testing** for Room and ViewModel to ensure code quality.
- Integrated **Google Maps SDK** for interactive maps and **place auto-search**.

Mealano, Food Planner Application

[Github](#) 

- Developed using **Java** and the **MVP architecture** with an **XML-based UI**.
- Implemented reactive concurrency with **RxJava** for efficient asynchronous operations.
- Leveraged **Room Database** for robust offline data access and user experience.
- Integrated **Firestore Database** and **Firestore Authentication** to enable seamless synchronization of user meal plans across devices.
- Utilized **Retrofit** for handling efficient and type-safe communication with RESTful APIs.
- Implemented **SharedPreferences** for managing application settings and user preferences.
- Integrated with the device's **Mobile Calendar Using Content Provider** to allow users to add meals to their schedules.

Skills

Technologies: Kotlin, Jetpack Compose, Retrofit, Room, DataStore, Navigation Compose, Hilt, Coil, Java, Firebase (Basic Knowledge), Unit Testing (Basic Knowledge), Instrumentation Testing (Basic Knowledge).

Tools: Android Studio, Android SDK, Gradle, Version Control System (Git and Github)

Soft Skills: Organized Thinking, Self discipline, Team Collaboration and Adaptability

Certificates

Native Android Development (Summer Training) – Information Technology Institute

July 2024 – Aug 2024

- learnt about core android development using kotlin
- built Recipe app with 4 teammates, find it on [Github](#) 

Android Development Workshop (3 Days) – AMIT Learning with Orange Digital Centers

Sept 2024

- learnt basics of Jetpack Compose
- Built Simple Meals Application using Jetpack compose find it on [Github](#) 

Mobile Development Training – Digital Egypt Pioneers Initiative - DEPI

Mar 2024 – Nov 2024

- focused on **Flutter**
- participated in Movie application using flutter. find it on [Github](#) 

Languges

Arabic: Native

English: Very Good

Additional Information

Malitry Status: Exempt
